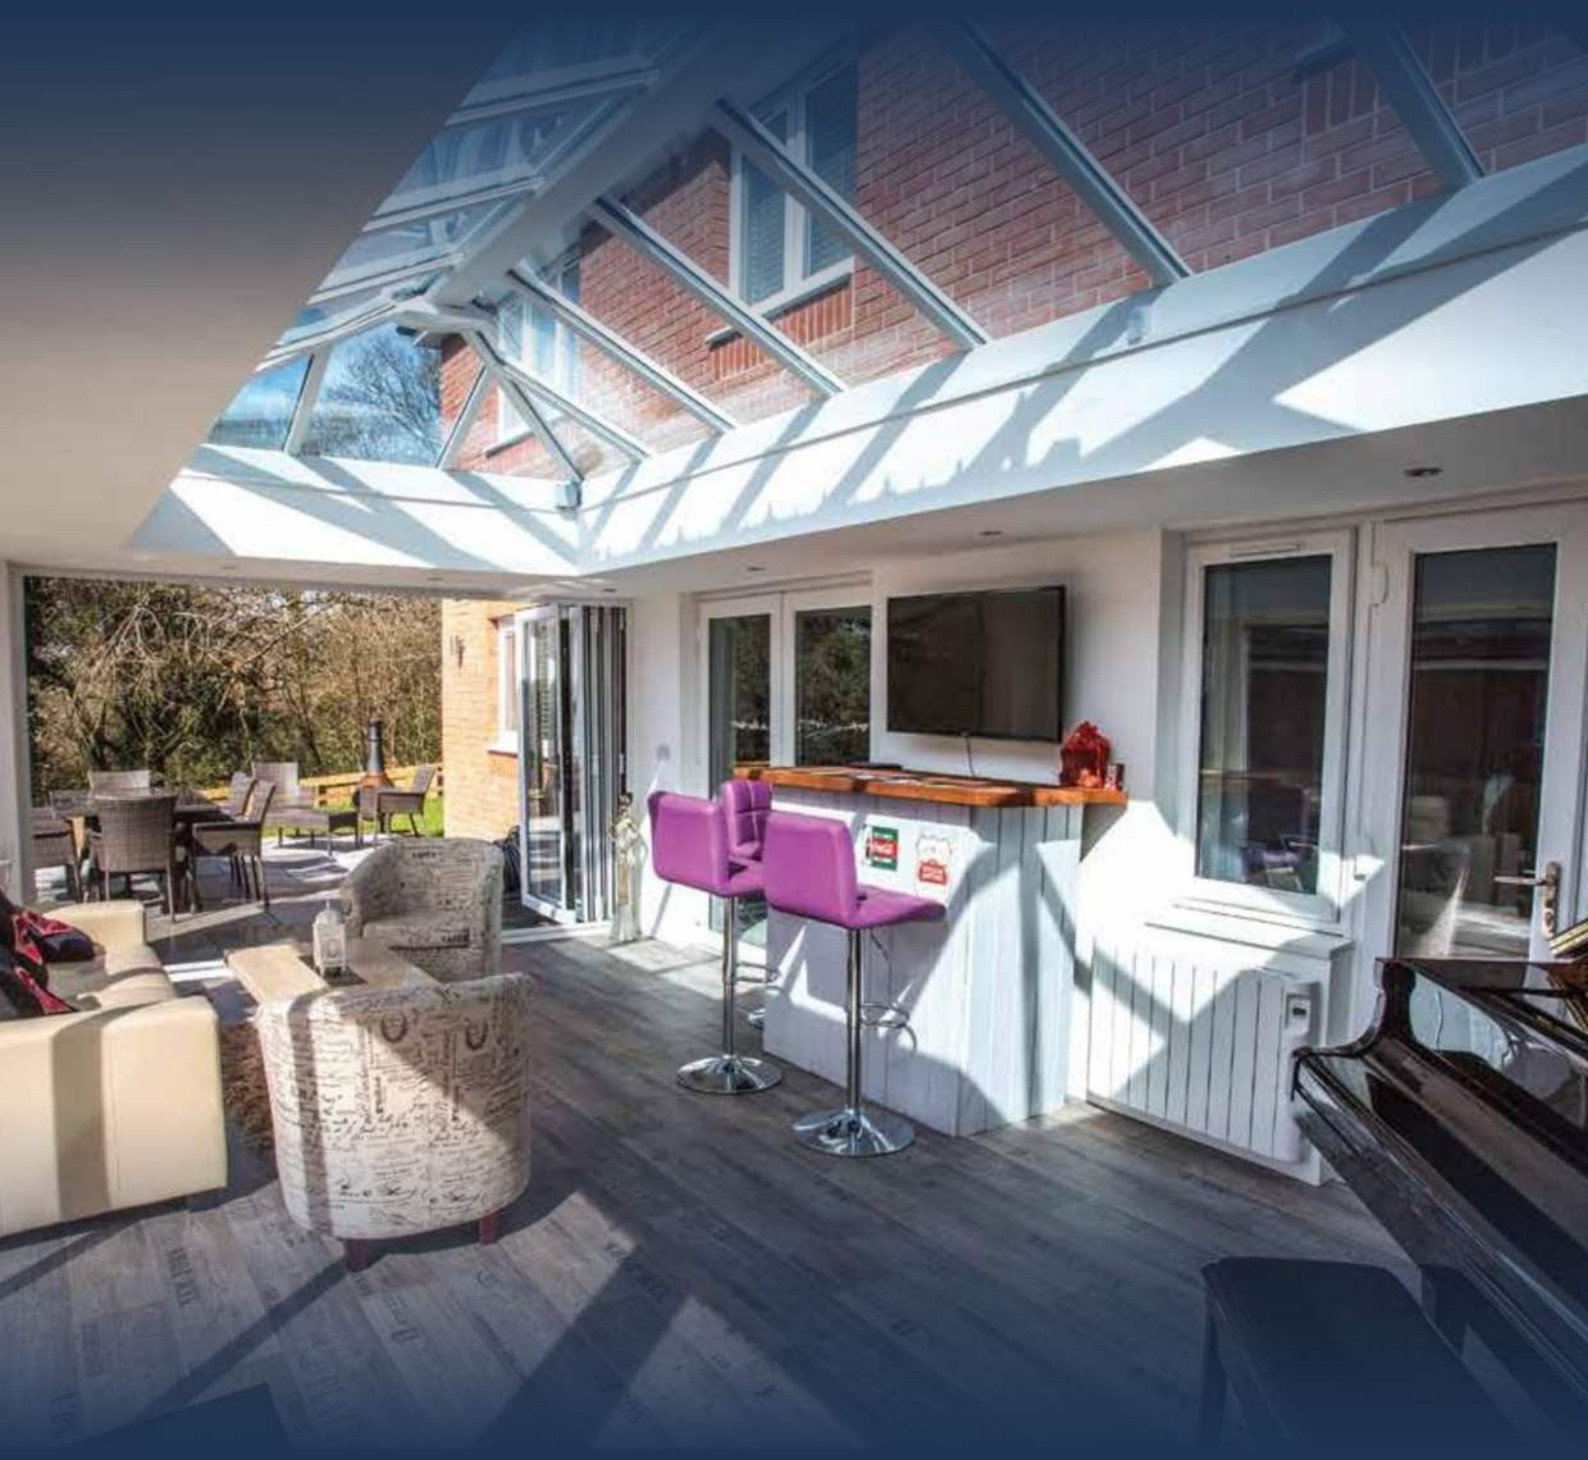
Replacement roofs that will transform your orangery into a functional and stunning space
- a space meant for living in!



Our orangery flat roof kit replaces your existing fibreglass, traditional build, glass or polycarbonate roofing system with a lightweight, unique and corrosion free system.

The 'Leka System' is approved by MFA, the licenced building inspector and is proven to outperform and outlast most traditional materials used in flat roof installations. It is a truly lightweight, Orangery flat roof system that has amazing span capabilities as well as thermal efficiency benefits.

What is the Leka Orangery Roofing System?

First, 'Glass Reinforced Plastic' rafter ladders are added to the existing orangery window frames. GRP is not prone to woodworm or moisture absorption like traditional timber or condensation and thermal bridging like aluminium.

Next, insulated PIR sheets are snugly fitted with a 15mm gap from the internal Leka sheets. We only use market leading brands, providing high-value thermal efficiency.

Then, strong, load-bearing and insulated outer sheets are added, ensuring less roofing bars and higher efficiency.

An outer weatherproof coating is then applied, making sure that your orangery roof is watertight and insulated.

The glass lantern is then lowered onto the structure and fixed into place.

Finally, the internal Leka sheets are added underneath the rafters. 100% waterproof and one third the weight of plasterboard, they provide unique thermal qualities and allow for a traditional plaster skim finish.

BESPOKE
INTERIORS

Helping you to make the most of a versatile space.

An orangery can be suited to most applications and create a fantastic addition to your living space for whatever you require it for. Open up the frontage perhaps or knock through into a kitchen creating open plan dining…….the choices are endless. Speak with the team and find out just how a Leka orangery kit can create a grand dwelling at a cost effective price.

PERFECT DAY & NIGHT

Create the perfect space for both day and night.

The surround spot-lighting which is optimised to cover every corner of the living space allows you to set the scene for any occasion. Customise your space with a range of lighting options allowing you to set the mood for any occasion. The Leka orangery roof system will also keep your living space at a regular temperature, day and night.

Why Choose the Leka Orangery Roofing System?

REGISTERED INSTALLER
LEKA
100 CLUB MEMBER

The orangery kit is incredibly lightweight, easy to install and complies with building regulation U-values. There are no aluminium or timber components in the build. The Leka System is built from four simple ladder kits made from GRP (glass reinforced plastic).

If you're looking to upgrade, replace or convert an orangery roof, our orangery roof conversion kit is up to 40% lighter than competitor products. It's the cutting-edge roofing system of choice for many installation companies and homeowners because of this. When only the very best will do, the Leka System delivers.

What Are The Benefits?

- Warm and cosy in the winter
- Cool and relaxing in the summer
- Industry leading energy values
- No Timber = No moisture absorption/rotting
- No Aluminium = No condensation or thermal bridging
- Fast fitting with minimal disturbance
- Designed for installation on orangery framework
- Lightweight structure
- Structurally tested GRP framework
- Building regulations compliant
